

Second Annual North Country "Current Issues" Survey - April 2023

Dates of Data Collection: April 5-14, 2023

Sampling Modalities: live telephone interviews, email invitations to complete online, intercept sampling

Weighting Procedures: Within Counties - weighted by gender, age, educational attainment, race/ethnicity, and military affiliation (only in Jefferson), Regionally - an additional weight for population size

Calibration: data was calibrated for sampling modality

Design Effect: weights were trimmed to a maximum of 5, resulting with a study Design Effect of 2.0

Margins of Error: Regionally ME=3.0%; Within Counties: Jefferson ME=4.4%, Lewis ME=6.0%, St. Lawrence ME=5.5%

Cross-tabulations: use only the current 2023 results, including the entire regional combined sample

Statistical Tests of Significance: Values in the same row and subtable not sharing the same subscript are significantly different at p<.05 in the two-sided test of equality for column proportions.

Cells with no subscript are not included in the test. Tests assume equal variances.

Tests are adjusted for all pairwise comparisons within a row of each innermost subtable using the Bonferroni correction.

NOTE 1: Percentage points are rounded off to the nearest whole number. As a result, percentages in a given table column may total slightly higher or lower than 100%. In questions that permit multiple responses, columns may total substantially more than 100%, depending on the number of different responses offered by each respondent.

NOTE 2: To ease interpretation, all tables use "subtotals", for example, "Agree" is the subtotal of "Strongly Agree" and "Somewhat Agree", therefore, columns will appear to sum to 200%. It is these subtotals that have had statistical tests applied.

DIVERSITY, EQUITY, and INCLUSION

Q1: I, or someone in my household, have been mistreated due to racism or subjected to racism while living in the North Country.
